ESTHETICS
Services Menu

FACIAL TREATMENT

We will analyze your skin to determine the avenue of treatment. Deep cleansing of the skin with exfoliation, corrective therapy, and massage designed specifically for your individual skin type and condition.

CHEMICAL EXFOLIATION

Deep exfoliation using alpha hydroxy acid, beta hydroxy acid, or enzyme exfoliant to improve the appearance of fine lines and wrinkles, hyperpigmentation, and overall skin texture. Also, beneficial for those with mild to moderate acne.

MICRODERMABRASION

Mechanical exfoliation for the treatment of sun damage, fine lines and wrinkles, enlarged pores, coarse textured skin, and open and closed comedones. Additionally, this treatment aids in smoothing scars.

LIGHT THERAPY

Speeds healing of the skin after chemical peels and microdermabrasion. Helps improve hyperpigmentation and capillary distention.
